

\$1 TRILLION CYBER-SECURITY PROBLEM

Enterprises are increasingly moving from on-premise storage to cloud storage because of greater user mobility and real-time collaboration applications. However, the biggest risk and largest cost involved in migrating a business to the cloud is in cyber-security. For every \$1 spent on cloud storage \$4 is spent on security to protect that storage. Nonetheless, for every \$4 spent on cyber-security around \$25 is still lost to cyber-crime. Despite the best efforts of the \$150 Billion cyber-security industry, losses to cyber-crime are now approaching US\$1 Trillion annually. Instead of adding multiple security layers on top of storage, a new approach integrating both storage and security at a granular level is now required.

THE CRYPTYK SOLUTION

CRYPTYK is *the first single vendor cloud storage and security solution for enterprise*, at less than half the cost of conventional multi-vendor offerings. This decentralized hybrid platform provides for low latency, encrypted cloud storage with built-in passive protection against all external, internal, viral and operational threats. It combines the speed, scalability and reliability of global cloud storage providers with the immutability and security of the blockchain. The result is a "one-size-fits-all" solution for both enterprises and their individual clients. Cryptyk's passively secure storage solution is effectively "safe-to-hack" and offers businesses and enterprises vastly superior security at lower operating costs. In addition, enterprise customers can generate new revenue streams by offering retail customers secure storage in a white-label format that leverages our B → B → C business model. This solution eliminates the profit for hackers and adds to their risk.

Cryptyk doesn't try to prevent the inevitable security breaches ... instead it ensures that anything stolen is useless to the hacker and leaves breadcrumbs on the blockchain.

KEY APPLICATIONS & USE CASES

Banking &
Financial
Services

Legal &
Accounting
Services

Medical &
Healthcare
Services

Multimedia
Content
Delivery

Crypto-currency
Exchanges &
Digital Wallets

Cryptyk technology can be tailored to suit any enterprise, business or consumer environment. However, we are currently focused on building solutions with partner customers for use cases where privacy and security are critical.

EXPERIENCED TEAM

DR ADAM WEIGOLD
CEO & FOUNDER
Quantum Physicist
Startup Veteran

RAGHU KOTHA
CTO & FOUNDER
Cyber-expert,
Former CISO SVB

DENNIS McMASTERS
CHIEF ARCHITECT
Former VP
Automation NYSE

DR DAN FLOREANI
ENTERPRISE SOLNS
Computer Scientist
ex VP Sales Cisco

JEN PENG
DIRECTOR & INVESTOR
